Congress of the United States
House of Representatives
Subcommittee on Health and the Environment
of the
Committee on Interstate and Foreign Commerce
Washington, D.C. 20515

April 19, 1979

Mr. John Alexander McMahon, President
American Hospital Association
444 North Capitol Street - Suite 500
Washington, D. C. 20001

Dear Mr. McMahon:

As Chairman of the Subcommittee on Health and the Environment of the Committee on Interstate and Foreign Commerce, I am formalizing the request of the Subcommittee to the American Hospital Association for data from the Association's annual survey regarding both annual expenses and annual revenues of hospitals, on a hospital-by-hospital basis.

As you know, the 96th Congress is currently considering hospital cost containment legislation which would potentially apply limits to both hospital expenses and hospital revenues. In order to evaluate the impact of this or similar legislation, it is both desirable and necessary that the members of Congress have available the most recent and most detailed hospital-specific data that can be produced.

The data collected by your organization is by all accounts virtually the only source of data currently available on hospital cost and revenue experiences. Unfortunately, the data regularly published by the AHA do not allow comparisons of changes in expense or revenues of individual hospitals over time -- precisely the information which is central to the hospital cost containment discussion.

Preliminary discussions have proceeded between our staffs regarding the details of the data requested. To summarize briefly, hospital-specific data are requested as follows:

- (a) by State; by community profit, community non-profit, and governmental classifications; and by bed size

Mr. John Alexander McMahon
April 19, 1979
Page Two

- (b) with indicators for each hospital regarding whether in the year reported in the 1977 survey it was a teaching or non-teaching hospital, whether it had less than 4,000 admissions, what its occupancy rate was, its number of inpatient days, its average stay, and the percent of its revenue represented by inpatient versus outpatient revenues
- (c) comparison data indicating, for 1976 and 1977, gross revenues, inpatient revenues, outpatient revenues, revenue per inpatient day, and total expenses, and the percentage change in each of these measures over the previous year.

I understand that the time necessary to produce the data is approximately two weeks. I look forward to receiving this information at that time. On behalf of the Subcommittee, let me thank you in advance for your cooperation.

Sincerely yours,

HENRY A. WAXMAN, M.C.
Chairman, Subcommittee on
Health and the Environment

AMERICAN HOSPITAL ASSOCIATION
444 NORTH CAPITOL STREET, N.W., SUITE 500, WASHINGTON, D.C. 20001 TELEPHONE 202-638-1100
WASHINGTON OFFICE

May 9, 1979

Dear Mr. Waxman

We appreciate your having formalized in your April 19th letter to Alex McMahon your earlier request for certain data to be derived from our Association's Annual Survey. Having your specific request allows us to identify, of the items requested, those which we can furnish and those which we cannot. We are pleased to be able to assist to the extent we are permitted, and as will be explained below, and regret for the reasons also outlined below to have to decline your request with respect to certain items.

Accordingly, there is transmitted herewith data from the AHA Annual Survey of Hospitals 1977. These include a list of government, non-profit community hospitals from the 1977 annual survey. They are listed alphabetically by state and stratified into five bedsize categories. All hospitals with admissions greater than 4,000 are identified by an (*) asterisk.

Associated with each hospital listed are seven other pieces of data:

1. Number of admissions
2. Total beds
3. Teaching or non-teaching status
4. Total expenses and percent change from 1976
5. Occupancy rate
6. In-patient days
7. Average stay

The other items requested, relating to revenue of individual hospitals, are not included.

As a matter of long practice and understanding with the participating institutions, we do not release or identify revenue information regarding the individual reporting institution. As completed questionnaires are

Mr. Waxman/2

May 9, 1979

returned to us, they are coded and stored on tape. The result is a tape which is an electronic copy of the Annual Survey questionnaire for each institution. This tape is used to produce the non-confidential data in the Guide to the Health Care Field, and the aggregated information in Hospital Statistics.

Inasmuch as hospitals' participation is entirely voluntary, we want to do nothing which would chill their desire to cooperate. Indeed, they have understood the need for the data and though given the option to report or not, have overwhelmingly chosen to support our efforts. We are impressed that the survey is completed and returned by about 6,500 of our 7,000 member hospitals.

Obviously, our release of confidential institution specific information would understandably discourage the kind of broad cooperation we have achieved. Surely we can agree on the importance to all of us, government users and private users, of not jeopardizing our ability to continue this unique facility.

Sincerely yours,

Richard L. Epstein, Esq.
Vice President and
Senior General Counsel

Honorable Henry A. Waxman, M.C.
Chairman, Subcommittee on
Health and the Environment
United States House of Representatives
Washington, D.C. 20515
